STATEMENT OF RELEVANCY

Reference AO (10-184410) on Form PTO-1449:

This reference is mentioned in the specification. This invention that is, in shift control in an automatic transmission, after engine torque-down control has started, an upward slope of hydraulic pressure to a hydraulic servo for an apply side friction engaging element and a downward slope of hydraulic pressure to a hydraulic servo for a release side friction engaging element are made gentler. Furthermore, after this timing, the engine torque is also gradually reduced. Thus, when a plurality of control targets are made to gradually increase and decrease in this way, the tuning of those control targets becomes difficult.
